BALTIC SEA, NORTH SEA AND LANDLOCKED MEMBER STATES

Brussels,
MARE E/E2/ D(2011)

Subject: Recommendations from the BSRAC for salmon and sea trout

Dear Sally,
Dear Sally Clink,

With reference to your letter of 10/06/2011, I was informed about the comments that were made about the salmon stock. I am pleased to learn that the BSRAC working group took the initiative to organise a meeting with the ICES representatives to discuss the scientific advice for salmon and sea trout stocks.

As you are well aware, the time available to prepare the fishing opportunities regulation is unfortunately very short.

May I suggest therefore that you send us your reactions on all the other points as soon as possible and by middle of July at the latest.

We understand the difficulties you may face to organise the meeting with the ICES representatives and therefore we would suggest dealing with your comments on salmon during the discussion in the Council.

Yours sincerely,

Carla MONTESI
Director
